Beliefs, Desires and Intentions

- Let us consider these three mental attitudes:
 - **Beliefs**
 - **Desires**
 - **Intents**
- Assignment Project Exam Help*
- <https://eduassistpro.github.io/>*
- Add WeChat edu_assist_pro*
- **Beliefs:** represent environmental characteristics, which are updated accordingly after the perception of each action.

Beliefs, Desires and Intentions

- **Desires:** Store information of; goals, properties and costs associated.

Assignment Project Exam Help

<https://eduassistpro.github.io/>

- **Intentions:** current action plan chosen.
Captures the **deliberative** component of the system.

Practical reasoning in a BDI agent

- **Belief revision function;** takes a perceptual input and the agent's current beliefs, and on the basis of these, determines a new set of beliefs;
- **Beliefs (current)** information about its current environment;
- **Option Generation Function;** determines available options, on the basis of its current beliefs about its environment and its current intentions.

Classes of Commitment Strategies

- Several degrees of commitment may be exhibited by agents.

- Rao and Georgeff i discrete points on this commitment contin

- ☐ **Blind Commitment**
- ☐ **Single-Minded Commitment**
- ☐ **Open-Minded Commitment**

Blind Commitment

Blind commitment is defined as the adherence to a commitment until such time as the agent believes the commitment has been achieved.

Add WeChat edu_assist_pro

Single-Minded Commitment

- Single-minded commitment represents a relaxation of blind commitment in that the agent will not drop its commitments unless it believes that they are no longer achievable.
<https://eduassistpro.github.io/>
- The computational overhead concerning whether a given goal is achievable can be considerable.
Add WeChat edu_assist_pro
- Rao and Georgeff suggest that this can be achieved by permitting belief revision but not goal revision.

Open-Minded Commitment

- Open-minded commitment offers a further relaxation in the willingness to revise its goals and beliefs, regarding commitments that are still compatible with its goals.

Coordination through Communication...

- Coordination represents the problem or activity of reconciling the actions of the individual agent with those of the **group** or indeed **organisation**.
Assignment Project Exam Help
- Since agents act from their goals and since agents are frequent **evolant** there **will** inevitably be conflict.
<https://eduassistpro.github.io/>
Add WeChat edu_assist_pro
- Such *interference* can only be reconciled through communication.
